1. (S/NF/SK) Statistics: Viewer: 018
Session date: 10 NOV 88
Start time: 0904
End time: 0932
Mode of operation: CRV
PI: Head cold
AV: none

2. (S/NF/SK) Cuing: 6-digit encrypted coordinates:
696910/131602.

3. (S/NF/SK) Tasking: Access and describe the site.

4. (S/NF/SK) Results:

a. The general site appears to be arid, very rough country with hills and a valley in the distance.

b. The site, itself, appears to be a multi-storied tan and brown structure (see sketch, page 3), with large, dark areas which appear to be tinted windows.

c. The inside of the structure revealed a clean, comfortable, well-furnished area which gave the overall impression of a "conversation pit". The people there were quiet, comfortable, pleasant, and very personable. "Working" there carried with it an added concept of "working around" things (obstacles or problems?).

d. One man was accessed who was the driving force behind the others. There was a definite impression that he cares fervently about his work, and that he is very nice, as long as things are going his way. He is a little socially detached, with his mind mainly on his "project". For all his pleasantness, he has a very limited sense of humor.
